NoiseMeters

Optimus Yellow Sound Level Meter

Features

- Simple to use
- Simultaneous measurement of all parameters
- 120 dB measurement range
- A, C and Z weightings
- Fast, Slow and Impulse response
- Bluetooth connection to mobile app

Applications

- Basic noise surveys
- Noise ordinance enforcement
- Fire alarm testing
- Office noise checks
- Machinery maintenance and trouble-shooting

Optimus Yellow

The Optimus Yellow is a calibrated, professional grade sound level meter for noise measurements that must meet the relevant international standards. Despite being a powerful meter, it is extremely easy to use, ensuring you get the correct measurements from the start.

The Optimus range of sound level meters uses the latest display technology and digital signal processing (DSP) techniques to provide you with a very powerful yet easy to use meter. The ease of use comes from the fact that all parameters are automatically measured at the same time, so no need to think about what you need in the split second before starting the measurement.

Making Noise Measurements

Making measurements usually consists of checking the calibration (adjustments are automatic) and then taking the readings.

Future Upgrade

Not sure if you need data logging? Maybe you don't know at this stage whether you might need an Integrating sound level meter. It could even be that eventually you may need octave band filters.

These features can be added at a later date. Some can even be fitted without returning the meter to the factory by remote update.

We can even change the meter from Class 2 to Class 1, although of course it must be returned for this upgrade.

Visit the **Options** tab for more details.
